

Satin finishing tool

Satifix® KR

Non-woven circular roller. The satin finishing roller consists of a 7-layer disc arrangement, resulting in an application width of approx. 50 mm, other versions available on request. The circular blanks are extremely flexible and can therefore be used to process highly profiled workpieces. Fleece qualities A 80 (coarse) to A 280 (very fine) or S100 (medium) – S800 (ultra fine).

For use with which machine:
